

CROP

Corn, Soybeans, Cotton,
Wheat, Alfalfa, Milo,
Peanuts, Rice,
Small Grains,
Sugar Beets, Fescue

TIMING

Planter box treatment,
seed over-treatment

RATE

Corn: 8oz per 100lbs
of seed; Soybean/
Alfalfa: 4oz per cwt of
seed; Winter Wheat:
4 oz/cwt of seed;
Other Crops: See label

PACKAGE

25lb. tubs, 5lb. pail

Apply nutrients and biostimulants directly to the seed.

Seed+Graphite is a nutritional seed treatment that improves germination, crop emergence, seedling vigor, and plant tolerance under abiotic stress, leading to higher yields. With a full nutrient package to establish a strong start and biostimulants to mitigate abiotic stress, Seed+Graphite helps crops push through environmental variability to maximize yield potential. A blend of talc + graphite enables excellent seed lubricity and placement through nearly every planter delivery system. Seed+Graphite is certified for organic use.

1. Talc + Graphite
for efficiency
at planting

Improves flowability
and reduces bridging
Dries seed and reduces
static electricity

2. Micronutrients
to support
seedling emergence
and a robust start

Improves emergence
and seedling vigor
Supports season-long
plant development

**3. Biostimulants and
Metabolites**
to set crops up for
season-long success

Mitigates
abiotic stressors
Fosters photosynthetic
activity and carbohydrate
production

SEED+GRAPHITE – EARLY SEASON ADVANTAGES

- Dry powder formulation for easy on-farm application in the planter box
- High antioxidant activity
- Provides essential nutrients for improved plant growth, development, and vigor
- Increased prominence of fine root hairs
- Supports seedlings by protecting plant cell function during harsh environmental conditions

SEED+GRAPHITE – PROTECTION FOR ABIOTIC STRESSORS

- Cold
- Heat
- Drought
- Excess

NUTRIENT ANALYSIS

	Calcium	Sulfur	Cobalt	Copper	Iron	Manganese	Molybdenum	Zinc
SEED+GRAPHITE	4.0%	5.0%	0.07%	0.09%	1.0%	0.7%	0.08%	2.0%

METHOD OF APPLICATION

Seed+Graphite is conveniently applied directly to seeds in the planter box at the time of planting. Apply Seed+Graphite the same way you apply seed lubricants - no new equipment needed. (See product label for details.)

GO BEYOND TALC AND GRAPHITE

Developed with proprietary technology, the three components in Seed+Graphite nutritional seed treatment/lubricant deliver efficiency at planting, a robust start for the crop, and defense against early season stress. Use as a talc/graphite replacement and apply right in the planter box.

**CERTIFIED FOR
ORGANIC USE**
